TAMING THE MACHINES

HOW SHOULD WE TALK ABOUT AI ETHICS?

PROF. DR. VINCENT C. MÜLLER (FR.-ALEXANDER-UNIV. ERLANGEN-NÜRNBERG)

PUBLIC LECTURE SERIES

About the lecture

It is now frequently observed that there is no proper scope and no proper method in the discipline of AI-ethics. This has become an issue in the development towards maturity of the discipline, e.g. canonical problems, positions, arguments … secure steps forward. We propose a minimal, yet universal view of the field (again Müller 2020). Given this proposal, we will know the scope and the method, and we can appreciate the wide set of contributions.

Tuesday, 30. April 2024
18:15–19:45 (CEST)

Flügelbau West, 2. OG, Raum W 221
