TAMING THE MACHINES

THE HUMAN IN AI:

ETHICAL PERSPECTIVES ON CHATBOTS AND
DEEPPAKES

About the lecture

In discussions about the regulation of AI, as well as in science and society, there is often talk of “human-centred” AI. Nevertheless, many people fear AI that is too human-like, with abilities and emotions similar to our own. This talk will explore the various concepts of the human in relation to AI. It will present applications of AI designed to appear human and address issues such as emotional manipulation, expectations of understanding, and data protection. Are human lookalikes a wolf in sheep's clothing?
