Student Assistant Position: Research student on Natural Language Processing

Language Technology Group at the Department of Informatics, UHH, is looking for one motivated student assistant (m/f/d) with a strong interest in natural language processing.

Tasks will involve text processing. More specifically, leverage existing tools to get statistics of given corpus, filtering text, etc. You will work with Dr. Özge Alaçam, Xintong Wang, a Ph. D. student, and other student assistants, master thesis students, under the overall supervision of Prof. Chris Biemann.

The position is to be filled for a maximum of 43 hours per month, and for 4 months (extension possible in agreement). In addition to the remuneration set for student assistants, we offer you a nice working atmosphere in a small, young and dynamic team, flexible working hours and insight into our current research activities with possible participation in publication activities. A starting date could be September 2021 with a certain flexibility.

What is needed

Fluency with Python programming language is a must. Good command of English. Besides, basic knowledge of natural language processing is required. Please send a short cover letter and overview of any relevant experience to xintong.wang@uni-hamburg.de. Applications should be sent by email as soon as possible. We strongly recommend you apply as soon as possible.

Other skills:

- Professional
- Reliable and committed
- Accurate and with attention to detail
- Good visualisation skills
